### napp-it Free licenses, any end-user

End-users can freely download and use napp-it Free without costs even commercially without a capacity limit but only if the download and installation is done inhouse and by firm members.

#### **Restrictions:**

- Extensions and appliance menus are not working
- Update is only possible from free to free edition (no bugfix or pro editions)
- no support

#### **Setup or configuration of a storage appliance on order:**

If the setup or any configuration or support of the storage appliance is done not by the end-user but on order by non firm members ex a software house or IT consultant, you always require a Pro license. You must download napp-it directly from napp-it.org.

#### **Redistribution:**

Redistribution (sell hardware with preconfigured napp-it) is only allowed for resellers with Pro bundling licenses.

A Pro bundling license is identical to napp-it Pro but adds the allowance to redistribute. This means that you can use your own optionally re-branded (ex with your logo) copy of napp-it
